Whitefield, Bengaluru, Karnataka, India (Open to Relocation / Remote)

Summary

Enthusiastic and detail-oriented software developer with a strong foundation in Python, Java and web technologies like HTML, CSS, JavaScript, React.js, and Node.js. Proficient in MySQL, MongoDB, REST APIs, and software development concepts, including Data Structures, Algorithms, OOP, and Software Engineering. Skilled in version control with GitHub and development tools like VS Code. I am eager to apply my technical knowledge and problem-solving skills to contribute to innovative projects and continuous learning.

Technical Skills

Languages & Databases: Python, Java, JavaScript, HTML, CSS, MySQL, MongoDB

Frameworks & Tools: React.js, Node.js, Express.js, Next.js, Redux, Bootstrap, Tailwind CSS

Concepts: Data Structures & Algorithms, REST API, OOP, OS, DBMS, AWS, Software Engineering

Soft Skills: Problem-Solving, Adaptability, Collaboration, Time Management

Education

B.Tech in Computer Science and Engineering

Lendi Institute of Engineering and Technology

CGPA: 7.52

2020 – 2024

Intermediate (MPC)

Sri Chaitanya Junior College

CGPA: 9.75

2018 – 2020

Secondary Education

Sri Narayana School

GPA: 9.7

2018

Internship Experience

Full Stack Development Intern

Oct 2024 – Mar 2025

Revature

Remote

- Developed and deployed two full-stack MERN applications, improving feature delivery speed by 30%.
- Developed responsive, cross-browser compatible UIs, boosting testing-phase user satisfaction by 40%.
- Applied modular architecture and clean code practices for scalable, maintainable solutions.
- Enhanced API performance by optimizing MongoDB queries and Express.js middleware.

PROJECTS

Prescripto – Full Stack Doctor Appointment Booking System | Project Link [↗](#)

- Developed a scalable healthcare platform with secure online payments, **role-based dashboards**, and real-time appointment scheduling using MERN stack.
- Integrated Razorpay API for seamless payments and implemented JWT authentication for security.
- Developed responsive dashboards using React.js and Tailwind CSS, ensuring cross-device compatibility.
- Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT, Razorpay.

Forever E-Commerce (Full Stack) | Project Link [↗](#)

- Designed and developed a full-stack e-commerce web application using the MERN stack, enabling users to browse, filter, and purchase products seamlessly.
- Integrated Stripe and Razorpay payment gateways to support secure online payments and Cash on Delivery (COD), improving checkout flexibility.
- Applied state management using Redux for a smooth, responsive shopping cart, order placement experience.

Weather Web Application | Project Link [↗](#)

- Engineered a professional, responsive weather web application leveraging HTML5, CSS3, and JavaScript to deliver real-time global weather updates with seamless cross-device compatibility.
- Integrated OpenWeatherMap API to dynamically fetch and display key weather metrics — including temperature, humidity, wind speed, and conditions — enhancing user engagement and reliability.
